# PREMIUM ORAL CARE

## CAVEX HEALTHY POPS

A dry mouth can occur for various reasons. Sometimes it's due to simple factors such as not drinking enough, smoking, or breathing through the mouth. Certain medications can also cause this, as well as hormonal changes, aging, or underlying conditions. In addition, medical treatments such as chemotherapy or radiation in the head and neck area can damage the salivary glands, significantly reducing saliva production.

Cavex Healthy Pops are specially developed with carefully selected ingredients that help moisten the mouth and thus contribute to a pleasant and refreshing feeling.

- **Betaine:** Thanks to its unique structure, it has a strong water-binding effect. Retaining water stimulates saliva production and provides a refreshing moisturizing effect. This not only keeps the mouth moist but also ensures a more comfortable feeling.

### Features

- Cherry flavor
- Moistens a dry mouth
- Bag contains 60 pieces
- Contains no sugar, gluten, dairy, soy, nuts, artificial flavors or fragrances

- **Xylitol:** A natural sugar substitute that helps prevent tooth decay by lowering the acidity in the mouth, stimulating saliva production, and inhibiting harmful bacteria.
- **Erythritol:** Inhibits the adhesion and growth of bacteria that cause plaque, such as *Streptococcus mutans*. This reduces biofilm formation. Moreover, erythritol is non-fermentable, meaning it does not produce acids that damage tooth enamel.
