CAVEX

1. Introduction

Before starting a dental whitening treatment, it is very important to properly clean the teeth to ensure an optimum whitening result.

Cavex Bite&White StainLess is a Teeth Whitening Activator & Stain Removal Paste.
It removes surface stains and plaque from teeth. Besides it enhances whitening treatments by optimizing the pH in the mouth.

- Mildly abrasive to enamel / dentin
- High cleaning and polishing values.
- Increases mouth pH as pre-treatment for teeth whitening.
- Not intended for regular use.

Cavex Bite&White StainLess is developed and manufactured by Cavex Holland B.V.
Cavex Bite&White StainLess is in compliance with the provisions of the Regulation (EC) 1223/2009 Concerning Cosmetic Products.

2. Composition

The basic ingredients of Cavex Bite&White StainLess are:

Raw Material	% Mass
Aqua	27,0
Sorbitol	25,0
Hydrated silica	21,0
Glycerin	14,0
Erythritol	5,0
Lithium magnesium sodium silicate	4,0
Poloxamer	2,0
Sodium Hexametaphosphate	1,0
Cellulose gum	<1
Xanthan Gum	<1

4. Laboratory control

Every batch Cavex Bite&White StainLess is in compliance with our internal testing:

Test	Test method	Cavex Stainless Release Specification	
Appearance	B10	Blue paste	
Flavour	B11	Lime / mint flavor	
pH	B12	6.8 – 8.2	
Viscosity	B13	10 – 10000	Pa.s

5. Shelf-life test

There is no official shelf-life test described for dental whitening products. Based on the results of internal tests, we can guarantee the good qualities of Cavex Bite&White for a period of 3 years, provided the product is stored at room temperature (25 °C) when not in use.

After opening the tube is no longer hermetically sealed and therefore recommended use within 12 month.

6. Quality Control

A batch of Cavex Bite&White StainLess, that has passed all the tests, is released for sales. In case of one or more requirements being not in specification, that batch is withdrawn and not sold.

7. Statement of non-toxicity

We hereby declare, that Cavex Bite&White StainLess can be safely used and is non-toxic to the patient as well as to the dental team.
Cavex Bite&White StainLess will also normally not be irritant to oral tissues and does not contain any hazardous ingredients in sufficient concentration to be harmful to human beings when used as directed.
